1020-2324	Dynojet Powervision, Black Series, Delphi EFI, non-CAN bus, for 01-10 Softails, 04-11 Dynas, 02-13 touring, 07-13 Sportsters The Dynojet Powervision is the cat's meow for EFI tuners. This is a flash type tuner that can be left on the bike or taken off after programming the factory ECM. If left on the bike, it can be used for diagnostics, as gauges, or for autotuning the fuel delivery. We will provide a starting point map from which you can autotune to dial it in for your specific combination. The autotune function works with your stock narrow-band oxygen sensors and does a good job through the meat of the riding range. An add-on wideband product is available that does a better job in the high load, high rpm areas of the map.	1	699.99	699.99T
